

REACH DECLARATION OF CONFORMITY

Loval Oy
Linnunrata 4,
FIN-07900 Loviisa
Finland

Field of application: Loval products, components and materials

Herewith we confirm that all products manufactured and supplied by Loval Oy are in compliance with the requirements specified in **REACH-regulation (no. 1907/2006)**.

Under the structure of the REACH directive Loval Oy is a manufacturer and supplier of “articles”. Articles supplied by Loval Oy do not contain any substances listed as substances of very high concern (SVHCs) in quantities over 0,1% by weight.

The REACH directive and the SVHC list are regularly reviewed by Loval Oy to ensure the compliance with the directive. Should any changes in the Directive or SVHC list affect our Customer, Loval Oy shall inform the customer of these changes. Articles of lead containing alloys are excluded from the scope of this declaration, statement for these articles can be found below.

Articles of lead containing alloys (brass and free cutting steel)

Some articles manufactured by Loval Oy contain parts made of copper or steel alloys that contain lead. Lead is a commonly used substance in copper alloys, such as brass. The most common copper alloy parts used for Loval products are brass flanges used for example in water heaters. Also, parts manufactured from free cutting steel may contain lead.

As metallic lead (CAS No. 7439-92-1) has been added to the SVHC (Substances of Very High Concern) list, Loval Oy is obliged to inform its customers about the lead content of the products supplied, as stated in the **article 33 of REACH Regulation**. components manufactured from above mentioned alloys, used in our products contain lead in w/w concentration above the threshold value of 0,1 %.

Loviisa, 11/12/2020
