

Heating and Brazing Solutions
Loval Engineering®

NEW Loval nano products

The new Ø4,2 mm Loval nano element offers a new range of products tailored for indirect heating purposes of sensitive media.

BENEFITS

- Triangle profile gives outstanding thermal conductivity
- High performance in indirect heating of sensitive media
- Compact size and smaller bending radius saves space
- Allows higher watts density compared to traditional sizes

TYPICAL APPLICATIONS

- Laboratory
- Professional kitchen
- Aviation
- Bioscience
- Medical industry
- Dairy & beverage industry
